

# SHOCK INDICATOR

## HIGH VISIBILITY

The Tool No. 1 for Preventing and Reducing Transport Disputes

## TRANSPORT MONITORING OF SHOCK-SENSITIVE PRODUCTS

### Put the Smile Back on your Client's Face!

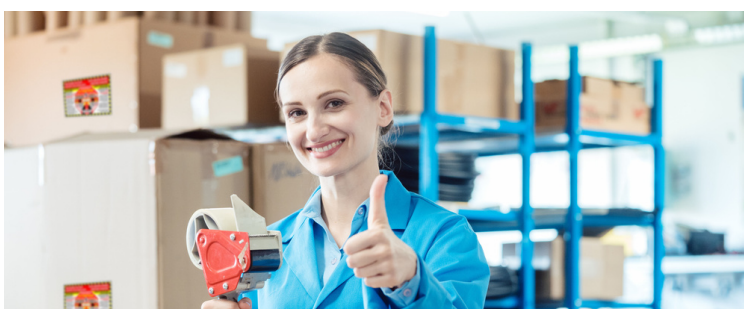

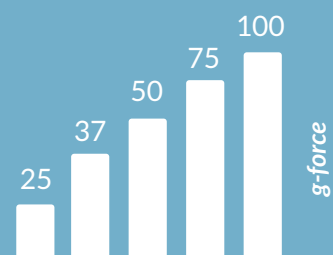

THERMOLABO Shock Indicators allow you at any time and at a glance, to check whether your package has suffered a rough handling or a damaging impact during transit or in storage.

They are suitable for all products (aeronautical items, electronic or medical devices etc.) and enable your customers to express indisputable reservations even if there is no damage at first sight.

Highly visible and deterrent, they identify and make responsible the trouble spots in your supply chain and encourage each operator to handle your fragile packages with care.

- Single-use
- Tamperproof
- Bilingual English/French
- Individual Identification by Serial Number & Barcode
- Suitable for All Products
- Wide Range from 25 to 100G
- ISO 9001 Manufacturing
- RoHS Compliant
- Easy to Use
- Fast Checking

### Available in 5 Sensitivities

# Easy to Setup and to Use

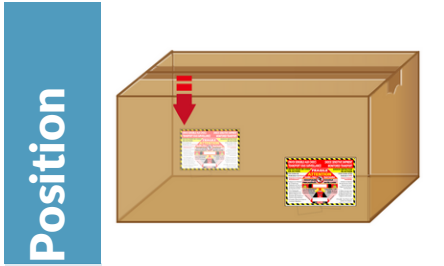

## Prepare

### Choose

Select your indicator according to the size and weight of your package. Use the **Companion and Info Stickers PROVIDED** to strengthen its visibility and inform the carrier and your recipient.

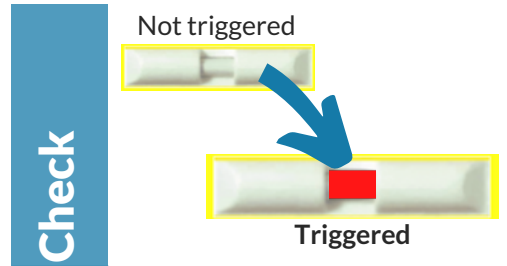

## Send

### Position

Position the indicator(s) on your package according to the **Instruction Manual PROVIDED**. Ship your package without forgetting to note the indicator serial number to ensure a perfect traceability of your shipments.

## Protect

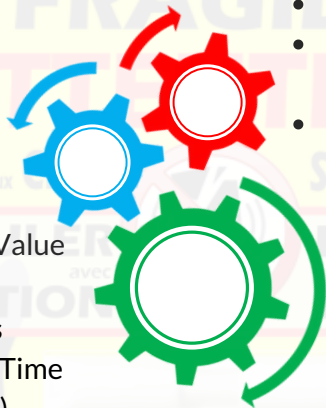

### Check

If your package has suffered a shock over the g force threshold, the tube in the middle of the indicator will irreversibly turn red. **Follow the Instructions on the Indicator to Preserve Future Remedy.**
