

# TILT INDICATOR

## HIGH VISIBILITY

The Tool No. 1 for Preventing and Reducing Transport Disputes

## TRANSPORT MONITORING OF TILT-SENSITIVE PRODUCTS

### Put the Smile Back on your Client's Face!

THERMOLABO Tilt Indicators allow you at any time and at a glance to check whether your package has suffered a tilt or an inclination more than 80 degrees.

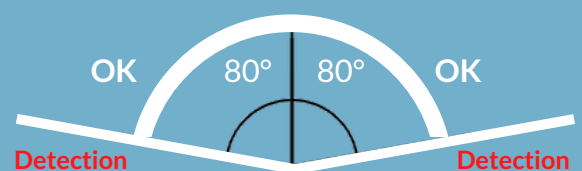

They are suitable for all tilt-sensitive products (*water heater, photocopier, electrical cabinets, etc.*). They enable your customers to express indisputable reservations even if there is no damage at first sight.

Highly visible and deterrent, they identify and make responsible the trouble spots in your supply chain and encourage each operator to handle your fragile packages with care.

- Single-use
- Bilingual English/French
- Individual Identification by Serial Number et Barcode
- ISO 9001 Manufacturing
- RoHS Compliant
- Easy to Use
- Fast Checking
- Companion and Info Stickers Provided

# Easy to Setup and to Use

## Prepare

### Activate

The tilt indicator is activated by peeling the adhesive backing from the device. Use the **Companion and Info Stickers PROVIDED** to strengthen its visibility and inform the carrier and your recipient.

## Send

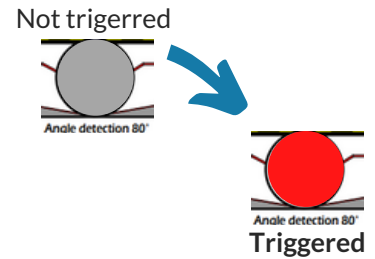

### Position

Position the indicator(s) on your package according to the **Instruction Manual PROVIDED**. Ship your package without forgetting to note the indicator serial number to ensure a perfect traceability of your shipments.

## Protect

### Check

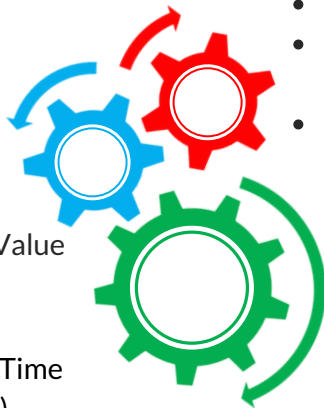

If your package did not remain upright, the round indicator in the middle of the device will turn irreversibly red. **Follow the Instructions on the Device to Preserve Future Remedy.**

## A Virtuous Solution...
